

MEMORANDUM FOR: Deputy Director for Science and Technology

25X1A FROM: [REDACTED]

[REDACTED] Assistant Director of Security

25X1A SUBJECT: Security [REDACTED]

REFERENCE: Memo dtd 24 Aug 77 for C/SMS/DD/S&T
from DD/S&T, same subject

25X1A (C) I have reviewed the referent memorandum and
25X1A can assure you that both Bob Gambino and I fully endorse
the desirability of a common approach with industry regard-
ing standardized industrial security policies and procedures
for all [REDACTED] programs. I cannot, however, make a judgment
at this time as to whether we have the personnel resources
to take on [REDACTED] areas in the course of our security
audits of contractor sites. Right now, we are conducting
our audits on a selective basis while we assemble the
personnel who will staff the new Industrial Security Branch.
We will have a better feel for the scope of the problem and
what we can and cannot handle after we have completed a
number of audits and accumulated more experience. In the
meanwhile, we would welcome discussion with [REDACTED] when- 25X1A
ever he is in this area.

MEMORANDUM FOR: Deputy Director for Science and Technology

FROM:

Acting Director of Security

SUBJECT: Security (C)

REFERENCE: Memo dtd 24 Aug 77 for C/SMS/DD/S&T
from DD/S&T, same subject

1. (C) I have reviewed the referent memorandum and fully endorse the desirability of a common approach with industry regarding standardized industrial security policies and procedures for all programs. However, the limited number of personnel which recently were approved for our new industrial security audit program for FY-78 precludes us from addressing requirements at this time. In fact, until this office is able to obtain additional staffing, we will have to conduct our audits on a rather selective basis.

2. (S) In addition to the recognition for the need of a common industrial security approach for all programs, and for additional personnel for the Office of Security audit program, the current industrial security programs managed by the command elements of this Agency, i.e., the OD&E/NRO funded program and the OL/Agency funded program, must be staffed with additional security officers, both at Headquarters in order to fulfill the mandate of the DCI for improvement of industrial security support to contractors. Such increased staffing should provide the requisite security inspection/monitoring capability necessary for the command elements to more effectively address their industrial security responsibilities.
